Using this manual

Thank you for purchasing this Samsung mobile device. This device will provide you with high quality mobile communication and entertainment based on Samsung’s exceptional technology and high standards.

This user manual has been specially designed to guide you through the functions and features of your device.

Read me first

• Please read all safety precautions and this manual carefully before using your device to ensure safe and proper use.
• The descriptions in this manual are based on the default settings of your device.
• Images and screenshots used in this user manual may differ in appearance from the actual product.
• Content in this user manual may differ from the product, or from software provided by service providers or carriers, and is subject to change without prior notice. Refer to www.samsungmobile.com for the latest version of the user manual.
• Available features and additional services may vary by device, software, or service provider.
• Formatting and delivery of this user manual is based on Google Android operating systems and may vary depending on the user’s operating system.
• Applications and their functions may vary by country, region, or hardware specifications. Samsung is not liable for performance issues caused by third-party applications.
• Samsung is not liable for performance issues or incompatibilities caused by user editing of registry settings.
• You may upgrade your mobile device’s software by accessing www.samsungmobile.com.
• Sound sources, wallpapers, and images provided in this device are licenced for limited use between Samsung and their respective owners. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Samsung is not liable for such copyright infringement by the user.
• Please keep this manual for future reference.

Instructional icons
Before you start, familiarise yourself with the icons you will see in this manual:

Warning—situations that could cause injury to yourself or others

Caution—situations that could cause damage to your device or other equipment

Note—notes, usage tips, or additional information

► Refer to—pages with related information; for example: ► p.12 (represents “see page 12”)

→ Followed by—the order of options or menus you must select to perform a step; for example: In Idle mode, open the application list and select Settings → About phone (represents Settings, followed by About phone)

[ ] Square brackets—device keys; for example: [©] (represents the Power/Lock key)

Assembling

Unpack
Check your product box for the following items:
• Mobile device
• Battery
• Travel adapter (charger)
• User manual

⚠️ Use only Samsung-approved software. Pirated or illegal software may cause damage or malfunctions that are not covered by your manufacturer’s warranty.

• The items supplied with your device may vary depending on the software and accessories available in your region or offered by your service provider.
• You can obtain additional accessories from your local Samsung dealer.
• The supplied accessories perform best for your device.
• Accessories other than the supplied ones may not be compatible with your device.

Install the SIM or USIM card and battery
When you subscribe to a cellular service, you will receive a Subscriber Identity Module (SIM) card, with subscription details, such as your personal identification number (PIN) and optional services. To use UMTS services, you can purchase a Universal Subscriber Identity Module (USIM) card.
To install the SIM or USIM card and battery,

1. If the device is on, press and hold [①] and select **Power off** to turn it off.
2. Remove the back cover.

Be careful not to damage your fingernails when you remove the back cover.

3. Insert the SIM or USIM card.

   - Place the SIM or USIM card into the device with the gold-coloured contacts facing down.
   - If you do not insert a SIM or USIM card, you can only use your device’s non-network services and some menus.
4 Insert the battery.

5 Replace the back cover.

**Charge the battery**

Before using the device for the first time, you must charge the battery.

You can charge the device with the provided travel adapter or by connecting the device to a PC with a PC data cable.

Use only Samsung-approved chargers and cables. Unauthorised chargers or cables can cause batteries to explode or damage your device.

When your battery is low, the device will emit a warning tone and display a low battery message. The battery icon will also be empty and turn red. If the battery level becomes too low, the device will automatically power off. Recharge your battery to continue using your device.
Charge with the travel adapter

1. Open the cover to the multifunction jack on the top of the device.

2. Plug the small end of the travel adapter into the multifunction jack.

3. Plug the large end of the travel adapter into a power outlet.
   - You can use the device while it is charging, but it may take longer to fully charge the battery.
   - While the device is charging, the touch screen may not function due to an unstable power supply. If this happens, unplug the travel adapter from the device.
   - While charging, the device may heat up. This is normal and should not affect your device's lifespan or performance.
   - If your device is not charging properly, bring your device and the charger to a Samsung Service Centre.

Improperly connecting the travel adapter can cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.
1 Open the cover to the multifunction jack on the top of the device.

2 Plug one end (micro-USB) of the PC data cable into the multifunction jack.

3 Plug the other end of the PC data cable into a USB port on a PC.

4 When the battery is fully charged (the battery icon is no longer moving), unplug the PC data cable from the device and then from the PC.

- Charge with the PC data cable
  Before charging, ensure that your PC is turned on.

- To store additional multimedia files, you must insert a memory card. Your device accepts microSD™ or microSDHC™ memory cards with maximum capacities of 32 GB (depending on memory card manufacturer and type).
Samsung uses approved industry standards for memory cards, but some brands may not be fully compatible with your device. Using an incompatible memory card may damage your device or the memory card and can corrupt data stored on the card.

• Your device supports only the FAT file structure for memory cards. If you insert a card formatted with a different file structure, your device will ask you to reformat the memory card.
• Frequent writing and erasing of data will shorten the lifespan of memory cards.
• When you insert a memory card in your device, the file directory of the memory card will appear in the sdcard folder.

1. Open the cover to the memory card slot on the side of the device.
2. Insert a memory card with the gold-coloured contacts facing down.
3. Push the memory card in the memory card slot until it locks in place.
4. Close the cover to the memory card slot.
Remove the memory card
Before removing a memory card, first unmount it for safe removal.

1. In Idle mode, select  → Settings → SD card and phone storage → Unmount SD card → OK.
2. Open the cover to the memory card slot on the side of the device.
3. Push the memory card gently until it disengages from the device.
4. Pull the memory card out of the memory card slot.
5. Close the cover to the memory card slot.

Format the memory card
Formatting your memory card on a PC may cause incompatibilities with your device. Format the memory card only on the device.

In Idle mode, select  → Settings → SD card and phone storage → Unmount SD card → OK → Format SD card → Format SD card.

Before formatting the memory card, remember to make backup copies of all important data stored on your device. The manufacturer’s warranty does not cover loss of data resulting from user actions.

Do not remove a memory card while the device is transferring or accessing information, as this could result in loss of data or damage to the memory card or device.
Attach a hand strap (optional)

1. Remove the back cover.
2. Slide a hand strap through the slot and hook it over the small projection.
3. Replace the back cover.
Getting started

Turn your device on and off

To turn on your device,

1. Press and hold [①].

2. If you turn on your device for the first time, follow the on-screen instructions to set up your device.

To turn off your device, press and hold [①] and select Power off.

Follow all posted warnings and directions from official personnel when in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals.

To use your device's non-network services only, switch to Airplane mode. Press and hold [①] and select Airplane mode.

### Use the touch screen

Your device’s touch screen lets you easily select items or perform functions. Learn basic actions to use the touch screen.
Control your touch screen with the following actions:

- **Tap**: Touch once with your finger to select or launch a menu, option, or application.
- **Tap and hold**: Tap an item and hold it for more than 2 seconds to open a pop-up option list.
- **Drag**: Tap and drag your finger up, down, left, or right to move to items on lists.
- **Drag and drop**: Tap and hold your finger on an item, and then drag your finger to move the item.
- **Double-tap**: Tap twice quickly with your finger to zoom in or out while viewing photos or web pages.

- Your device turns off the touch screen when you do not use the device for a specified period.
- You can adjust the backlight time. In Idle mode, open the application list and select **Settings** → **Display** → **Screen timeout**.

- To avoid scratching the touch screen, do not use sharp tools.
- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- Do not allow the touch screen to come into contact with water. The touch screen may malfunction in humid conditions or when exposed to water.
- For optimal use of the touch screen, remove the screen protection film before using your device.
- Your touch screen has a layer that detects small electrical charges emitted by the human body. For best performance, tap the touch screen with your fingertip. The touch screen will not react to touches of sharp tools, such as a stylus or pen.
Lock or unlock the touch screen and keys

You can lock the touch screen and keys to prevent any unwanted device operations.

To lock, press [🔒]. To unlock, turn on the screen and drag right until it reaches the dot.

Get to know the idle screen

When the device is in Idle mode, you will see the idle screen. From the idle screen, you can view your device’s status and access applications.

The idle screen has multiple panels. Scroll left or right to a panel of the idle screen.

Add items to the idle screen

You can customise the idle screen by adding shortcuts to applications or items in applications, widgets, or folders. To add items to the idle screen,

1. Press [☰] → Add or tap and hold the empty area on the idle screen.
2. Select the item category → an item:
   - **Widgets**: Add widgets. Widgets are small applications that provide convenient functions and information on your idle screen.
   - **Shortcuts**: Add shortcuts to items, such as applications, bookmarks, and contacts.
   - **Folders**: Create a new folder or add folders for your contacts.
   - **Wallpapers**: Set a background image.

Available items may vary depending on the current idle screen mode.
Move items on the idle screen

1. Tap and hold an item to move until the item appears gray.
2. Drag the item to the location you want.

Remove items from the idle screen

1. Tap and hold an item to remove.
   The trash bin appears at the bottom of the idle screen.
2. Drag the item to the trash bin.
3. When the item turns red, release the item.

Use the shortcuts panel

In Idle mode or while using an application, tap the indicator icons area and drag your finger down to open the shortcuts panel. You can activate or deactivate wireless connection features and access a list of notifications, such as messages, calls, events or processing status. To hide the list, drag the bottom of the list up.

From the shortcuts panel, you can use the following options:

- **Wi-Fi**: Activate or deactivate the WLAN connection feature. ► p. 83
- **B/T**: Activate or deactivate the Bluetooth wireless connection feature. ► p. 81
- **GPS**: Activate or deactivate the GPS feature.
- **Silent**: Activate or deactivate Silent mode.
- **Auto rotation**: Activate or deactivate the auto rotation.

Available options may vary depending on your region or service provider.
Add or remove panels to the idle screen

You can add or remove panels of the idle screen to organise widgets according to your preferences and needs.

   You can also place your two fingers on the screen and pinch to switch to Edit mode.

2. Add or remove panels by using the following features:
   • To remove a panel, tap and hold the thumbnail of a panel and drag it to the trash bin at the bottom of the screen.
   • To add a new panel, select +.
   • To change the order of the panels, tap and hold the thumbnail of a panel and drag it to the location you want.

3. When you are finished, press [→].

Access applications

To access your device’s applications,

1. In Idle mode, select 🔎 to access the application list.

2. Scroll left or right to another application screen.

3. Select an application.

   • When you use applications provided by Google, you must have a Google account. If you do not have a Google account, sign up for a Google account.
   • You can add a shortcut to an application by tapping and holding the application icon from the application list. You can move the icon to the location you want on the idle screen.
Getting started

Press [usaha] to return to the previous screen; Press the Home key to return to the idle screen.

Your device has a built-in motion sensor that detects its orientation. If you rotate the device while using some features, the interface will automatically switch to landscape view. To set the interface to keep the orientation when you rotate the device, select **Settings → Display → Auto-rotate screen**.

Organise applications

You can reorganise the applications in the application list by changing their order or grouping them into categories to suit your preferences and needs.

1. In the application list, press [usaha] → **Edit**.
2. Tap and hold an application.
3. Drag the application icon to the location you want. You can move an application icon to another main menu screen.
4. Press [usaha] → **Save**.

To change the order of the main menu screens,

1. In the application list, place your two fingers on the screen and pinch.
2. Tap and hold the thumbnail of a screen and drag it to the location you want.

Access recent applications

1. Press and hold the Home key to open the list of applications you have accessed recently.
2. Select an application to access.
Use the task manager

Your device is a multitasking device. It can run more than one application at the same time. However, multitasking may cause hang-ups, freezing, memory problems, or additional power consumption. To avoid these problems, end unnecessary programs using the task manager.

1 In Idle mode, open the application list and select Task manager → Active applications.
   The list of all the applications currently running on your device appears.

2 To close an application, select End.
   To close all active applications, select End all.

Customise your device

Get more from your device by customising it to match your preferences.

Set the current time and date

1 In Idle mode, open the application list and select Settings → Date and time.

2 Set the time and date and change other options.

Turn on or off the touch tone

In Idle mode, open the application list and select Settings → Sound → Audible selection.

Adjust the volume of the ringtones

Press the Volume key up or down to adjust the ringtone volume.

Switch to Silent mode

To mute or unmute your device, do one of the following:

• In Idle mode, open the application list and select 📲 → Keypad and tap and hold #.
• Open the shortcuts panel from the top of the screen and select Silent.
• Press and hold [PARTMENT] and select Silent mode.

➤ Change your ringtone
1 In Idle mode, open the application list and select Settings → Sound → Phone ringtone.
2 Select a ringtone from the list and select OK.

➤ Activate animation for switching windows
In Idle mode, open the application list and select Settings → Display → Animation → Some animations or All animations.

➤ Select a wallpaper for the idle screen
1 In Idle mode, press [FONT] → Wallpaper → an option.
2 Select an image.

3 Select Save or Set wallpaper. Samsung is not responsible for any use of default images or wallpapers provided on your device.

➤ Adjust the brightness of the display
1 In Idle mode, open the application list and select Settings → Display → Brightness.
2 Drag the slider to adjust the level of brightness.
3 Select OK. The brightness level of the display will affect how quickly the device consumes battery power.

➤ Set a screen lock
You can lock the touch screen with an unlock pattern or password to prevent unauthorised people from using the device without your permission.
• Once you set a screen lock, your device will require an unlock code each time you turn it on or unlock the touch screen.
• If you forget your PIN or password, bring your device to a Samsung Service Centre to reset it.
• Samsung is not responsible for any loss of security codes or private information or other damages caused by illegal software.

Set an unlock pattern

1 In Idle mode, open the application list and select Settings → Location and security → Set screen lock → Pattern.

2 See the on-screen instructions and example patterns and select Next (if necessary).

3 Draw a pattern by dragging your finger to connect at least 4 dots.

4 Select Continue.

5 Draw a pattern again to confirm.

6 Select Confirm.

Set an unlock PIN code

1 In Idle mode, open the application list and select Settings → Location and security → Set screen lock → PIN.

2 Enter a new PIN (numeric) and select Continue.

3 Enter the PIN again and select OK.

Set an unlock password

1 In Idle mode, open the application list and select Settings → Location and security → Set screen lock → Password.
2 Enter a new password (alphanumeric) and select Continue.
3 Enter the password again and select OK.

Lock your SIM or USIM card
You can lock your device by activating the PIN supplied with your SIM or USIM card.

1 In Idle mode, open the application list and select Settings → Location and security → Set up SIM card lock → Lock SIM card.
2 Enter your PIN and select OK.

Once the PIN lock is enabled, you must enter the PIN each time you turn on the device.

- If you enter an incorrect PIN too many times, your SIM or USIM card will be blocked. You must enter a PIN unlock key (PUK) to unblock the SIM or USIM card.
- If you block your SIM or USIM card by entering an incorrect PUK, bring the card to your service provider to unblock it.

Enter text
You can enter text by selecting characters on the virtual keypad or by inputting handwriting on the screen.

- You cannot enter text in some languages. To enter text, you should change the writing language to one of the supported languages. ► p. 103
Change the keyboard type
You can change the keyboard type. Tap and hold the text input field and select **Input method** → a keyboard type (Swype or Samsung keypad).

Enter text using the Swype keyboard
1 Select the first character of a word and drag your finger to the second character without releasing the finger from the screen.
2 Pause on the second character for a moment and drag the finger to the next character.

3 Continue until you have finished the word.

4 Release the finger on the last character. The word is inserted into the text input field.

5 Repeat steps 1–4 to complete your text. Tap and hold each key to enter additional characters.
You can also use the following keys:

<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Change case.</td>
</tr>
<tr>
<td>2</td>
<td>Switch between Symbol mode and ABC/Number mode.</td>
</tr>
<tr>
<td>3</td>
<td>Insert a space.</td>
</tr>
<tr>
<td>4</td>
<td>Delete characters.</td>
</tr>
<tr>
<td>5</td>
<td>Start a new line.</td>
</tr>
<tr>
<td>6</td>
<td>Enter text by voice; This icon is available only when you activate the voice input feature for the Samsung keypad. This feature may be unavailable depending on the selected input language.</td>
</tr>
</tbody>
</table>

- To hide the Swype keyboard, press [•].
- To view help information for using the Swype keyboard, tap and hold 📺.

**Enter text using the Samsung keypad**

1. Select ℹ️ → Portrait keypad types and select a text input method.
   
   You can select one of key input methods (QWERTY or traditional keypad) or handwriting input methods.

2. Enter text by selecting alphanumeric keys or writing on the screen.
You can also use the following keys:

![Keypad diagram]

<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Change case.</td>
</tr>
<tr>
<td>2</td>

</tr>
<tr>
<td>7</td>
<td>Insert a space; Insert a period (double-tap); Change the input language (scroll left or right). Functions of this key may vary depending on your service provider.</td>
</tr>
</tbody>
</table>

If you have text input keyboards downloaded from the web, you can change the keypad type. Tap and hold the text input field and select **Input method** → a keypad type.
Copy and paste text
While you are entering text, you can use the copy and paste feature to use text in other applications.

1. Place the cursor where you want to start.
2. Tap and hold the text input field.
3. Select **Select text** from the option list.
4. Tap on the place where you want to end.
5. Tap and hold the highlighted text.
6. Select **Copy** to copy, or **Cut** to cut the text onto the clipboard.
7. In another application, tap and hold the text input field.
8. Select **Paste** to insert the text from the clipboard into the text field.

Download applications from Android Market
Based on the Android platform, your device's functionality can be extended by installing additional applications. Android Market provides you an easy and quick way to shop for games and mobile applications.

- This feature may be unavailable depending on your region or service provider.
- Your device will save user files from downloaded applications to the internal memory.

Install an application
1. In Idle mode, open the application list and select **Market**.
2. Select **Accept** when the terms and conditions appear.
3. Select an item category → an item.
Select **Install** (for free items) or **Buy**.
If you select **Install**, select **OK** to download the item immediately.
If you select **Buy**, you need to enter your credit card information. Follow the on-screen instructions.

### Uninstall an application

1. From the Android Market home screen, press `[≡]` → **Downloads**.
2. Select the item you want to delete.
3. Select **Uninstall** → **OK**.

### Download files from the web

When you download files or web applications from the web, your device saves them in a memory card.

- Files you download from the web can include viruses that will damage your device. To lessen your risk, only download files from sources you trust.
- Some media files include Digital Rights Management to protect copyrights. This protection may prevent you from downloading, copying, modifying, or transferring some files.

To download files from the web,

1. In Idle mode, open the application list and select **web’n’walk**.
2. Search for a file or application and download it.

To install applications downloaded from websites other than Android Market, you must select **Settings** → **Applications** → **Unknown sources**.
**Synchronise data**

You can synchronise data with various web servers and back up or restore your data.

Once the synchronisation is completed, your device stays connected to the web. If any change is made on the web, the updated information will appear on your device and will automatically begin synchronisation, and vice versa.

This feature may be unavailable depending on your region or service provider.

» **Set up a server account**

1. In Idle mode, open the application list and select **Settings → Accounts and sync.**
2. Select **Add account → an account type.**
3. Follow the on-screen instructions to complete the account setup.
   For online community services, such as Facebook or MySpace, enter your user name and password and select **Log in.**

» **Activate automatic sync**

1. In Idle mode, open the application list and select **Settings → Accounts and sync.**
2. Select **Auto-sync.**
3. Select an account.
4. Select the applications you want to synchronise.
   To exclude applications from automatic synchronisation, clear the check boxes next to the applications you want.

Synchronise data
You can synchronise data with various web servers and back up or restore your data.

Once the synchronisation is completed, your device stays connected to the web. If any change is made on the web, the updated information will appear on your device and will automatically begin synchronisation, and vice versa.

This feature may be unavailable depending on your region or service provider.

» **Set up a server account**

1. In Idle mode, open the application list and select **Settings → Accounts and sync.**
2. Select **Add account → an account type.**
3. Follow the on-screen instructions to complete the account setup.
   For online community services, such as Facebook or MySpace, enter your user name and password and select **Log in.**

» **Activate automatic sync**

1. In Idle mode, open the application list and select **Settings → Accounts and sync.**
2. Select **Auto-sync.**
3. Select an account.
4. Select the applications you want to synchronise.
   To exclude applications from automatic synchronisation, clear the check boxes next to the applications you want.
Synchronise data manually

1. In Idle mode, open the application list and select **Settings → Accounts and sync.**

2. Select an account.

3. Press `[ ] → **Sync now.** Your device will start synchronising the data you set for synchronisation.
Communication

Calling
Learn to use calling functions, such as making and answering calls, using options available during a call or customising and using call-related features.

Make and answer a call
You can use the buttons or the touch screen when you make, accept, end, or reject calls.

Make a call
1 In Idle mode, open the application list and select Keypad, and enter an area code and a phone number.
2 Select to make a call.
3 To end the call, select End call.

Use the phonebook to save numbers you dial frequently. ► p. 64
- To quickly access the call log to redial the numbers you dialled recently, select → Logs.

Answer a call
1 When a call comes in, drag right until it reaches the dot.
2 To end the call, select End call.

When the device is ringing, press the Volume key to mute the ringtone.
Reject a call
When a call comes in, drag left until it reaches the dot. The caller will hear a busy tone.

Call an international number
1 In Idle mode, open the application list and select Keypad, and tap and hold 0 to insert the + character.
2 Enter the complete number you want to dial (country code, area code and phone number), and then select to dial the number.

Use options during a call
You can use the following options while a call is in progress:
• To adjust the voice volume, press the Volume key up or down.
• To place a call on hold, select Hold. To retrieve a held call, select Unhold.
• To dial a second call, select Add call and then dial a new number.
• To answer a second call, drag right until it reaches the dot when a call waiting tone sounds. The device asks whether to end or hold the first call. You must subscribe to the call waiting service to use this feature.

Use the headset
By plugging a headset into the device, you can answer and control calls hands-free:
• To answer a call, press the headset button.
• To reject a call, press and hold the headset button.
• To place a call on hold or retrieve a held call during a call, press and hold the headset button.
• To end a call, press the headset button.
• To open the dialling screen, select **Dialpad**.
• To listen and talk to the other party via a Bluetooth headset, select **Headset**.
• To turn off the microphone so that the other party cannot hear you, select **Mute**.
• To activate the speakerphone feature, select **Speaker**.

   ![Note](image)
   In noisy environments, you may have difficulty hearing some calls while using the speakerphone feature. For better audio performance, use the normal phone mode.

• To switch between the two calls, select **Swap**.
• To make a multiparty call (conference call), make or answer a second call when connected to the second party, select **Merge calls**. You must subscribe to the multiparty call service to use this feature.

### View and dial missed calls
Your device will display calls you have missed. To dial the number of a missed call, open the shortcuts panel and select the missed call notification.

### Use additional features
You can use various other call-related features, such as Fixed Dialling Number (FDN) mode, or call diverting.

#### Use Fixed Dialling Number (FDN) mode
In FDN mode, your device will restrict outgoing calls, except for the numbers stored in the FDN list. To activate FDN mode,

1. In Idle mode, open the application list and select **Settings → Call settings → Fixed Dialing Numbers → Enable FDN**.
Set call waiting
Call waiting is a network feature to alert you of an incoming call while you are on a previous call.
In Idle mode, open the application list and select Settings → Call settings → Additional settings → Call waiting. Your setting will be sent to the network.

View call logs
You can view logs of your calls filtered by their types.
1. In Idle mode, open the application list and select 📞 → Logs.
2. Press [⋮] → View by → an option to sort the call logs.
From the call logs, you can make a call or send a message directly to a contact by flicking the contact to the left or right.

Set call forwarding
Call diverting is a network feature to send incoming calls to another number that you specify. You can set this feature separately for several conditions when you are not able to answer calls, such as when you are already on the phone or when you are outside of the service area.

1. In Idle mode, open the application list and select Settings → Call settings → Call forwarding.
2. Select a condition.
3. Enter a number to which calls will be forwarded and select Enable.
Your setting will be sent to the network.

Enter the PIN2 supplied with your SIM or USIM card and select OK.
Select FDN list and add contacts to be used in FDN mode.

In Idle mode, open the application list and select Settings → Call settings → Additional settings → Call waiting.
Your setting will be sent to the network.

View call logs
You can view logs of your calls filtered by their types.
1. In Idle mode, open the application list and select 📞 → Logs.
2. Press [⋮] → View by → an option to sort the call logs.
From the call logs, you can make a call or send a message directly to a contact by flicking the contact to the left or right.

Enter the PIN2 supplied with your SIM or USIM card and select OK.
Select FDN list and add contacts to be used in FDN mode.

Set call waiting
Call waiting is a network feature to alert you of an incoming call while you are on a previous call.
In Idle mode, open the application list and select Settings → Call settings → Additional settings → Call waiting. Your setting will be sent to the network.

View call logs
You can view logs of your calls filtered by their types.
1. In Idle mode, open the application list and select 📞 → Logs.
2. Press [⋮] → View by → an option to sort the call logs.
From the call logs, you can make a call or send a message directly to a contact by flicking the contact to the left or right.
Select a log to view its details.

From the detail view, you can dial the number, send a message to the number or add the number to the phonebook.

**Messaging**

Learn to create and send text (SMS) or multimedia (MMS) messages, and view or manage messages you have sent or received.

You may incur additional charges for sending or receiving messages while outside your home service area. For details, contact your service provider.

▶ **Send a text message**

1. In Idle mode, open the application list and select **New message**.

2. Select **Contacts**.

   You can enter a number manually or select one from the logs or contact groups by selecting another option.

3. Select contacts and select **Add**.

4. Select **Tap to compose** and enter your message text. To insert emoticons, press `→ Insert smiley`.

5. Select **Send** to send the message.

▶ **Send a multimedia message**

1. In Idle mode, open the application list and select **New message**.

2. Select **Contacts**.

   You can enter a number manually or select one from the logs or contact groups by selecting another option. When you enter an email address, the device will convert the message to a multimedia message.
3 Select contacts and select Add.

4 Select Tap to compose and enter your message text. To insert emoticons, press [ ] → Insert smiley.

5 Select → an option and add an item. You can select a file from the file list or create a new photo, video, or sound.

6 Press [ ] → Add subject and add a subject for the message.

7 Select Send to send the message.

View a text or multimedia message

1 In Idle mode, open the application list and select . Your messages are grouped into message threads by contact, like a messenger.

2 Select a contact.

3 Select a text or multimedia message from the message thread.

Listen to voice mail messages

If you have set missed calls to be diverted to the voice mail server, callers may leave voice messages when you do not answer incoming calls. To access your voice mail inbox and listen to voice mail messages,

1 In Idle mode, open the application list and select → Keypad and then tap and hold 1.

2 Follow the instructions from the voice mail server.
   You must save the voice mail server number before accessing the server. Your service provider can give you the number.
Google Mail

You can retrieve new email messages from Google Mail™ to your Inbox. When you access this application, the Inbox screen appears. The total number of unread messages displays in the title bar and unread messages display in bold. If you have labelled a message, its label appears in a coloured rectangle on the message.

- This feature may be unavailable depending on your region or service provider.
- This Google Mail menu may be labelled differently depending on your service provider.

Send an email message

1. In Idle mode, open the application list and select Google Mail.
3. Enter a name or address in the recipient field.
4. Enter a subject and message.
6. Select to send the message.

View email messages

1. In Idle mode, open the application list and select Google Mail.
2. Select an email message.

From the message view, use the following options:
- To reply to the message, select.
- To reply to the message including all recipients, select → Reply all.
- To forward the message to other people, select → Forward.
• To add a star to the message, select ✽.
• To view an attachment, select Preview. To save it to your memory card, select Download.
• To archive the message, select Archive.
• To delete the message, select Delete.
• To move to the previous or next message, select ◀ or ▶.

Organise email by labels
You can organise your email by labelling your messages or adding stars to mark important messages. You can sort messages by label filter.

Add a label to a message
1 From the Inbox screen, tap and hold a message.
2 Select Change labels.
3 Select a label to add and select OK.

Add a star to a message
1 From the Inbox screen, tap and hold a message.
2 Select Add star. The star icon next to the message is activated.

Filter messages
1 From the Inbox screen, press [▶] → Go to labels.
2 Select the label of the messages you want to view.

Email
Learn to send or view email messages via your personal or company email account.

Set up an email account
1 In Idle mode, open the application list and select Email.
2 Enter your email address and password.
3 Select **Next** (for general email accounts) or **Manual setup** (for other company email accounts).

4 Follow the on-screen instructions.

When you are finished setting up the email account, the email messages are downloaded to your device. If you have created more than two accounts, you can switch between email accounts; Press [≡] → **Accounts** and select one you want to retrieve messages from.

**Send an email message**

1 In Idle mode, open the application list and select **Email** → an email account.

2 Press [≡] → **Compose**.

3 Select **Contacts**.

You can enter an email address manually or select one from the logs or contact groups by selecting another option.

4 Select contacts and select **Add**.

5 Select the Cc/Bcc field and add more recipients.

6 Select the subject field and enter a subject.

7 Select the text input field and enter your email text.

8 Select **Attach** and attach a file.

   You can select a file from the file list or create a new photo, video, or sound.

9 Select **Send** to send the message.

   If you are offline or outside your service area, the message will be held in the message thread list until you are online and in your service area.

**View an email message**

When you open an email account, you can view previously retrieved emails offline or connect to the email server to view new messages. After retrieving email messages, you can view them offline.
1 In Idle mode, open the application list and select **Email** → an email account.

2 Press [ epilepsy] → **Refresh** to update the message list.

3 Select an email message.

From the message view, use the following options:

- To reply to the message, press [ epilepsy] → **Reply**.
- To forward the message to other people, press [ epilepsy] → **Forward**.
- To delete the message, press [ epilepsy] → **Delete**.
- To move the message to another folder, press [ epilepsy] → **Move to**.
- To load images from the message, press [ epilepsy] → **Show pictures**.
- To view an attachment, select the attachment item. To save it to your memory card, select [ epilepsy].

---

**Talk**

Learn to chat with friends and family via Google Talk™.

This feature may be unavailable depending on your region or service provider.

**Add friends to your friend list**

1 In Idle mode, open the application list and select **Talk**. The friend list shows all of your Google Talk contacts at a glance.

2 Press [ epilepsy] → **Add friend**.

3 Enter an email address of the friend and select **Send invitation**.

When your friend accepts the invitation, the friend is added to your friend list.
Start a chat
1 In Idle mode, open the application list and select Talk.
2 Select a friend from the friend list. The chat screen opens.
3 Enter your message and select Send.
4 To switch between active chats, press [⿴⿵] → Switch chats.
5 To end the chat, press [⿴⿵] → End chat.

Social Hub
Learn to access Social Hub™, the integrated communication application for Social Network Service (SNS), email, messages, instant messages (IM), contacts or calendar information. Visit http://socialhub.samsungmobile.com for more details.
1 In Idle mode, open the application list and select Social Hub.
2 Check and use contents delivered from Social Hub.
Entertainment

Camera
Learn how to capture and view photos and videos. You can take photos at resolutions up to 2560 x 1920 pixels (5 megapixels) and videos at resolutions up to 320 x 240 pixels.

To use the camera, you must first insert a memory card.

- The camera interface appears only in the landscape orientation.
- Tap the screen to hide or display icons in the viewfinder.
- The camera automatically turns off when you do not use it for a specified period.
- The memory capacity may differ depending on the shooting scene or shooting conditions.

Capture a photo

1. In Idle mode, open the application list and select Camera.
2. Rotate the device anti-clockwise to landscape view.
3. Aim the lens at the subject and make any necessary adjustments.
<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
</table>
| 1      | Check the camera status and settings.  
    • [ ][ ]: Resolution  
    • [ ][ ]: Exposure metre type  
    • [ ][ ]: Number of photos you can take (according to available memory)  
    • [ ][ ]: Storage location |
| 2      | Change the shooting mode. |
| 3      | Change the scene mode. |
| 4      | Change the flash setting; You can manually turn the flash on or off or set the camera to automatically use the flash when needed. |
| 5      | Change the camera settings. |
| 6      | Switch to the camcorder. |
| 7      | Capture a photo. |
| 8      | View the photo you captured last. |

4. Press the Volume key to zoom in or out.
5. Select 📸 to take a photo. The photo is saved automatically.

After taking photos, select 📷 to view the taken photos.
- To view more photos, scroll left or right.
- To zoom in or out, tap the screen and select 🕵️ or 🕵️. You can also double tap the screen to zoom in or out.
- To send a photo to others, select Share.
- To set a photo as wallpaper or a caller ID image for a contact, select Set as.
- To delete a photo, select Delete.
Capture a photo by using preset options for various scenes

Your camera provides you with predefined settings for various scenes. You can simply select the proper mode for your shooting condition and subjects.

For example, when you take photos at night, select the night mode that uses an extended exposure.

1. In Idle mode, open the application list and select **Camera**.
2. Rotate the device anti-clockwise to landscape view.
3. Select **SCN** → a scene.
4. Make any necessary adjustments.
5. Select **[ ]** to take a photo.

Capture a photo in Smile shot mode

Your camera can recognise people's faces and help you take photos of their smiling faces.

1. In Idle mode, open the application list and select **Camera**.
2. Rotate the device anti-clockwise to landscape view.
3. Select **[ ]** → **Smile shot**.
4. Make any necessary adjustments.
5. Select **[ ]**.
6. Aim the camera lens at your subject.

Your device recognises people in an image and detects their smiles. When the subject smiles, the device automatically takes a photo.
Capture a panoramic photo
You can take wide panoramic photos using Panorama shooting mode. This mode is convenient for photographing landscapes.

1. In Idle mode, open the application list and select Camera.
2. Rotate the device anti-clockwise to landscape view.
3. Select 📷 → Panorama.
4. Make any necessary adjustments.
5. Select 📷 to take the first photo.
6. Slowly move the device in any direction and align the green frame with the viewfinder. When you have aligned the green frame and viewfinder, the camera will automatically take the next photo.
7. Repeat step 6 to complete the panoramic photo.

Capture a series of photos
You can easily take a series of photos of moving subjects. This is useful when you are photographing children at play or a sporting event.

1. In Idle mode, open the application list and select Camera.
2. Rotate the device anti-clockwise to landscape view.
3. Select 📷 → Continuous.
4. Make any necessary adjustments.
5. Tap and hold 📷. The camera will continue to take photos until you release the key.
Customise camera settings

<tbody>
<tr>
<td>Image</td>
<td>Extension: bmp, gif, jpg, png, wbmp, agif</td>
</tr>
</tbody>
</table>
| Video | • Extension: 3gp, mp4  
       | • Codec: MPEG4, H.263, H.264 |

- Some file formats are not supported depending on the software of the device.
- If the file size exceeds the available memory, an error can occur when you open files.

View a photo

1. In Idle mode, open the application list and select Gallery.
2. Select a folder.
3. To change the view mode, select or at the top right of the screen.
4. Select a photo (with no icon) to view.

While viewing a photo, use the following options:
- To view more photos, scroll left or right.
- To zoom in or out, select or . You can also tap the screen with two fingers and spread them apart (move your fingers closer together to zoom out).
- To start a slideshow in the selected folder, select Slideshow. Tap the screen to stop the slideshow.
Play a video

1. In Idle mode, open the application list and select Gallery.
2. Select a video (with the icon) to play.
3. Rotate the device anti-clockwise to landscape view.
4. Control playback with the virtual keys.

Share images or videos

1. In Idle mode, open the application list and select Gallery.
2. Select a folder.
3. Select an image or video file.
4. Select Menu → Share → a sharing option.

Music

Learn to listen to your favourite music while on the go with the music player. The music player supports the following file formats: mp3, ogg, aac.

To use the music player, you must first insert a memory card.

- You can also play music files in the following formats if you open them from My files, multimedia messages, or on the web browser: mid, xmf, rtttl, imy, rtx, ota, amr, wav, mxmf.
- Some file formats are not supported depending on the software of the device.
- If the file size exceeds the available memory, an error can occur when you open files.
Add music files to your memory card

Start by transferring files to your memory card:
- Download from the wireless web. ► p. 71
- Download from a PC with the optional Samsung Kies. ► p. 87
- Receive via Bluetooth. ► p. 82
- Copy to your memory card. ► p. 88

Play music

After transferring music files to your device or memory card,

1 In Idle mode, open the application list and select Music.
2 Select a music category → a music file.

Control playback with the following keys:

<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Pause playback; Select ► to resume playback.</td>
</tr>
<tr>
<td>2</td>
<td>Skip backward; Scan backward in a file (tap and hold).</td>
</tr>
<tr>
<td>3</td>
<td>Move to a point of the file by dragging the bar.</td>
</tr>
</tbody>
</table>
Create a playlist

1. In Idle mode, open the application list and select Music.
2. Select a category → a music file.
4. Enter a title for your new playlist and select Save.
5. To add more music files to the playlist, play a file and press [Menu] → Add to playlist → the new playlist.

Use the party shuffle feature

When you turn on the party shuffle feature, your device selects and plays music files randomly.

1. In Idle mode, open the application list and select Music.
3. To turn off the party shuffle feature, press [Menu] → Party shuffle off.
### FM radio

Learn to listen to music and news on the FM radio. To listen to the FM radio, you must connect a headset, which serves as the radio antenna.

#### Listen to the FM radio

1. Plug a headset into the device.
2. In Idle mode, open the application list and select **FM radio**.

   The FM radio scans and saves available stations automatically.

   The first time you turn on the FM radio, you will be prompted to start automatic tuning.

### Customise music player settings

1. In Idle mode, open the application list and select **Music**.
2. Select a category → a music file.
3. Press [Menu] → **Settings**.
4. Adjust the following settings to customise your music player:

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 channel</td>
<td>Set whether or not to activate the virtual 5.1 channel surround sound system when a headset is connected.</td>
</tr>
<tr>

<td>Add the current radio station to the favourites list.</td>
</tr>
<tr>
<td>5</td>
<td>Adjust the volume.</td>
</tr>
</tbody>
</table>

▷ Save a radio station automatically

1 Plug a headset into the device.

2 In Idle mode, open the application list and select FM radio.

3 Press [MENU] → Scan → a scanning option. The FM radio scans and saves available stations automatically.
Add a radio station to the favourites list

1. Plug a headset into the device.
2. In Idle mode, open the application list and select **FM radio**.
3. Select [ ] to turn on the FM radio.
4. Scroll to the radio station you want.
5. Select [ ] to add to the favourites list.

You can add a name for a radio station or remove a radio station; Tap and hold a radio station on the favourites list and select **Remove** or **Rename**.

Customise FM radio settings

1. In Idle mode, open the application list and select **FM radio**.
2. Press [ ] → **Settings**.
3. Adjust the following settings to customise your FM radio:

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Region</td>
<td>Select your region.</td>

Contacts
Learn to create and manage a list of your personal or business contacts. You can save names, mobile phone numbers, home phone numbers, email addresses, birthdays and more for your contacts.

Create a contact
1 In Idle mode, open the application list and select 📞.
2 Select 📞.
3 Select a memory location.
   If you have more than one account, select an account to which you want to add the contact.
4 Enter contact information.
5 Select Save to add the contact to memory.

You can also create a contact from the dialling screen.
1 In Idle mode, open the application list and select 📞 → Keypad.
2 Enter a phone number.
3 Select Add to Contacts → 📞.
4 Select a memory location.
   If you have more than one account, select an account to which you want to add the contact.
5 Enter contact information.
6 Select Save to add the contact to memory.
Find a contact
1 In Idle mode, open the application list and select 📱.
2 Scroll up or down on the contact list.
3 Select a contact’s name.

Once you find a contact, you can:
• call the contact by selecting a phone number.
• send a message by selecting Message.
• send an email message by selecting an email address.
• edit the contact information by pressing [≡] → Edit.

Set a speed dial number
1 In Idle mode, open the application list and select 📱.
2 Press [≡] → More → Speed dial.
3 Select a location number → a contact.
   You can quickly dial this number by touching and holding the location number from the dialling screen.

Create your namenocard
1 In Idle mode, open the application list and select 📱.
2 Press [≡] → My profile.
3 Enter your own personal details.
4 Select Save.
   You can send your namecard by attaching it to a message or email or transferring it via the Bluetooth wireless feature.
Retrieving contacts from your community accounts
You can view the list of community website accounts and select an account to add a contact from the website to your phone contacts.

1. In Idle mode, open the application list and select 📞.
3. Select an account.

Create a group of contacts
By creating groups of contacts, you can manage multiple contacts and send messages or email to an entire group. Start by creating a group.

1. In Idle mode, open the application list and select 📞 → Groups.
2. Press [☞] → Create.
3. Enter a name and select a ringtone for the group.
4. Select Save.

Copy contacts
To copy contacts from the SIM or USIM card to your device,
1. In Idle mode, open the application list and select 📞.
2. Press [☞] → Import/Export → Import from SIM card.
3. Select contacts to copy and select Import.

To copy contacts from your device to the SIM or USIM card,
1. In Idle mode, open the application list and select 📞.
2. Press [☞] → Import/Export → Export to SIM card.
3. Select contacts to copy and select Export → Yes.
Import or export contacts
To import contact files (in vcf format) from a memory card to your device,
1. In Idle mode, open the application list and select 📞.
2. Press [شق] → Import/Export → Import from SD card.
3. Select a memory location.
   If you have more than one account, select an account to which you want to add the contact.
4. Select an option for importing a single contact file, multiple contact files, or all contact files, and select OK.
5. Select contact files to import and select OK.

To export contacts from your device to a memory card,
1. In Idle mode, open the application list and select 📞.
2. Press [شق] → Import/Export → Export to SD card.
3. Select Yes to confirm.

View the communication log
You can view the communication log of calls, messages, email or SNS threads.
1. In Idle mode, open the application list and select 📞 → History.
2. Select an item you want to view.
View social network activities
You can view the recent activities of contacts in social network services, such as Facebook, MySpace, and Twitter.

1. In Idle mode, open the application list and select Calendar → Activities.
2. Select an item you want to view.

Calendar
Learn to create and manage daily, weekly or monthly events, and set alarms to remind yourself of important events.

Create an event
1. In Idle mode, open the application list and select Calendar.
3. Enter the details of the event as required.
4. Select Done.

View events
To change the calendar view,

1. In Idle mode, open the application list and select Calendar.
2. Press [Menu] and select Day, Week, or Month.
To view events of a specific date,

1. In Idle mode, open the application list and select Calendar.
2. Select a date on the calendar. In month view, days with scheduled events are indicated by a blue bar.
   To select today's date, press [⇒] → Today.
3. Select an event to view its details.

» **Stop an event alarm**
If you set an alarm for a calendar event, the event alarm icon will appear at the specified time.

1. Open the shortcuts panel from the top of the screen.
2. Select a reminder to view more details about the event.
3. To snooze or dismiss the reminder, select Snooze all or Dismiss all.

**Memo**
Learn to record important information to save and view at a later date.

» **Create a memo**
1. In Idle mode, open the application list and select Memo.
2. Select Create memo or press [⇒] → Create.
3. Enter your memo text.
4. Press [←] to hide the keypad.
5. Select a colour to change a background colour.
6. Select Save.
› View memos

1 In Idle mode, open the application list and select Memo.
2 Select a memo to view its details.

⚠ You can send the memo to others by tapping and holding the memo and selecting Send via → an option.

Voice recorder

Learn to operate your device’s voice recorder.
To use the voice recorder, you must first insert a memory card.

› Record a voice memo

1 In Idle mode, open the application list and select Voice recorder.
2 Select Record to start recording.
3 Speak into the microphone.
4 When you are finished recording a memo, select Stop. Your memo is saved automatically.
5 To record more voice memos, select Record from the bottom of the screen.

Play a voice memo

1 In Idle mode, open the application list and select Voice recorder.
2 Select List.
3 Select a voice memo to play.

⚠ You can send the voice memo to others by pressing [佢] → Share.
Web

Web services require a data connection. Contact your operator to choose the best data plan.

web'n'walk

Learn to access and bookmark your favourite web pages.

- You may incur additional charges for accessing the web and downloading media. For details, contact your service provider.
- The web browser menu may be labelled differently depending on your service provider.
- Available icons may vary depending on your region or service provider.

Browse web pages

1 In Idle mode, open the application list and select web'n'walk to launch a specified homepage.
   To access a specific web page, select the URL input field, enter the web address of the web page, and select  .

2 Navigate web pages with the following keys:

   ![Diagram showing navigation keys for web pages]
<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Enter the web address of a web page to access.</td>
</tr>
<tr>
<td>2</td>
<td>Open a list of saved bookmarks, frequently visited pages and recent internet history.</td>
</tr>
</tbody>
</table>

The screen may differ depending on your region or service provider.

While browsing the web page, use the following options:

- To zoom in or out, double-tap the screen. You can also use the two finger zoom; Place your two fingers on the screen and slowly pinch or spread apart.
- To open a new window, press [ ] → **New window**.
- To view the currently active windows, press [ ] → **Windows**. You can open multiple pages and switch back and forth between them.
- To reload the current web page, press [ ] → **Refresh**.
- To go to the next page in history, press [ ] → **Forward**.
- To bookmark the current web page, press [ ] → **Add bookmark**.
- To add a shortcut to the current web page to the idle screen, press [ ] → **More** → **Add shortcut to Home**.
- To add the RSS feed, press [ ] → **More** → **Add RSS feeds**.
- To search for text on the web page, press [ ] → **More** → **Find on page**.
- To view web page details, press [ ] → **More** → **Page info**.
- To send the web address of the web page to others, press [ ] → **More** → **Share page**.
- To view the download history, press [ ] → **More** → **Downloads**.
- To customise browser settings, press [ ] → **More** → **Settings**.
Bookmark your favourite web pages
If you know the web address of a web page, you can manually add a bookmark. To add a bookmark,

1. In Idle mode, open the application list and select `web'n'walk`.
2. Select 🌟 → **Bookmarks**.
3. Select **Add** or press [.ctrl] → **Bookmark last-viewed page**.
4. Enter a page title and a web address.
5. Select **OK**.

From the bookmark list, tap and hold a bookmark and use the following options:
• To open the web page in the current window, select **Open**.
• To open the web page in a new window, select **Open in new window**.

• To edit the bookmark details, select **Edit bookmark**.
• To add the bookmark shortcut to the idle screen, select **Add shortcut to Home**.
• To send the web address of the web page to others, select **Share link**.
• To copy the web address of the web page, select **Copy link URL**.
• To delete the bookmark, select **Delete bookmark**.
• To use the web page as your homepage of the browser, select **Set as homepage**.

Access the frequently visited pages or the recent history

1. In Idle mode, open the application list and select `web'n'walk`.
2. Select 🌟 → **Most visited** or **History**.
Activate location services to use with Google Maps
You must activate location services to find your location and search the map.

1. In Idle mode, open the application list and select Settings → Location and security.
2. Adjust the following settings to activate location services:

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use wireless networks</td>
<td>Set to use WLAN and/or mobile networks for finding your location.</td>
</tr>
<tr>
<td>Use GPS satellites</td>
<td>Set to use the GPS satellite for finding your location.</td>
</tr>
</tbody>
</table>

Maps
Learn to use Google Maps™ to find your location, search the map for streets, cities, or countries, and get directions.

To receive better GPS signals, avoid using your device in the following conditions:

- between buildings, in tunnels or underground passages, or inside buildings
- in poor weather
- around high voltage or electromagnetic fields

Do not touch the internal antenna area or cover this area with your hands or other objects while using the GPS functions.

This feature may be unavailable depending on your region or service provider.

Select a web page to access.

You can add a web page to the bookmark list by selecting the star icon on the right.

Maps

Select a web page to access.

You can add a web page to the bookmark list by selecting the star icon on the right.
Search for a specific location

1 In Idle mode, open the application list and select Maps.
   The map will display your current location.

2 If you are launching this application for the first time, select OK to confirm.

3 Press [➡️] → Search or select 👇.

4 Enter a keyword for the location and select ➥.
   • To search for a location by voice, select 🎤.
   • To zoom in or out, select 🕐 or ☀️.
   • To add layers to the map, select 🌈.
   • To view your current location, select 📍.
   To add a star to the location, select the balloon of the location name → ⭐.

Get directions to a specific destination

1 In Idle mode, open the application list and select Maps.

2 Press [➡️] → Directions.

3 Enter the addresses of the starting location and the ending location.
   To enter an address from your contact list or point the location on the map, select 📞 → Contacts or Point on map.

4 Select a travel method (car, bus, or walk) and select Go.

5 Select a travel route to view details of your trip (if necessary).

6 Select Show on map.

7 When you are finished, press [➡️] → Clear Map.
Share your location via Google Latitude
Learn to share your location with your friends and view friends' locations via Google Latitude™.

1. In Idle mode, open the application list and select Latitude.
   The device automatically joins Latitude.
2. Press [ ] → Add friends → Select from Contacts or Add via email address.
3. Select friends you want to add or enter an email address, and select Add friends → Yes.
   When your friend accepts your invitation, you can share locations.
4. Press [ ] → See map.
   Your friends' locations are marked with their photos on the map.

Search for a place around you
This feature may be unavailable depending on your region or service provider.

1. In Idle mode, open the application list and select Places.
2. Select a category.
   Your device searches for places around your current location that are related to the category.
3. Select a place name to view its details.
   To view the place on the map, select 🗺️.
Navigate to your destination
Learn to use the GPS navigation system to find and show your destination with voice guidance.

This feature may be unavailable depending on your region or service provider.

1. In Idle mode, open the application list and select Navigation.

2. If you are launching this application for the first time, select Accept.

3. Enter your destination by using one of the following methods:
   • **Speak Destination**: Speak your destination such as "Navigate to destination."
   • **Type Destination**: Enter your destination with the virtual keypad.

   • **Contacts**: Select your destination from addresses of your contacts.
   • **Starred Places**: Select your destination from the list of your starred places.

4. Select Install to use voice-guided navigation.

Google Search
You can search for applications in your device and specific data on the web.

1. In Idle mode, open the application list and select Google Search.

2. Enter a letter or a word of the data to search.

3. Select the item’s name you want to access.
YouTube
Learn to view and upload videos via YouTube.

This feature may be unavailable depending on your region or service provider.

Watch videos
1. In Idle mode, open the application list and select YouTube.
2. If you are launching this application for the first time, select Accept to confirm.
3. Select a video from the list.
4. Rotate the device anti-clockwise to landscape view.

Control playback with the following keys:

<table>
<thead>
<tr>
<th>Number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Move to a point of the file by dragging the bar.</td>
</tr>
<tr>
<td>2</td>
<td>Change the quality of the display.</td>
</tr>
</tbody>
</table>

Upload videos
1. In Idle mode, open the application list and select YouTube.
2 Press [_DIRS] → **Upload** and select a video. Skip to 8. If you want to upload new videos, select [CAM] to turn on the camera.

3 Rotate the device anti-clockwise to landscape view.

4 Aim the lens at the subject and make any adjustments.

5 Select ◯ to start recording.

6 Select ■ to stop recording.

7 Select Save to upload the video that you have recorded.

8 Enter your user name and password and select **Sign in**.

---

### View the weather information

1 In Idle mode, open the application list and select **News & Weather**.

2 Select **Weather** at the top of the screen. Your device searches for your current location and displays the weather information.

   🌋 You can change the location to view the weather information in another region. Press [_DIRS] → **Settings** → **Weather settings** and clear the check box next to **Use my location**. Then select a location in **Set location**.

---

### Read news articles

1 In Idle mode, open the application list and select **News & Weather**.

2 Select a news topic at the top of the screen.

---

### News & Weather

Learn to view the weather information and read top news and other news articles.
3 Select an article to open.

To add news topics, press [🌞] → Settings → News settings → Select news topics.

Samsung Apps

Samsung Apps allows you to simply and easily download an abundance of applications directly to your device. Featuring a wealth of games, news, reference, social networking, navigation, health related applications and more, Samsung Apps gives you instant access to a huge choice of mobile experience.

Your device gets smarter with fully optimised applications from Samsung Apps. Explore amazing applications and make your mobile life even better.

- The feature may be unavailable depending on your region or service provider.
- For details, please visit www.samsungapps.com.

Market

You can download games, ringtones, or other applications from the Android Market.

- This feature may be unavailable depending on your region or service provider.

1 In Idle mode, open the application list and select Samsung Apps.
2 Search for and download applications as desired.

1 In Idle mode, open the application list and select Market.
2 Search for a file and download it to the device. ➤ p. 33
Connectivity

Bluetooth

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 10 m without requiring a physical connection.

You do not need to line up the devices to beam information with Bluetooth. If the devices are within range of one another, you can exchange information between them even if they are located in different rooms.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth wireless feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by Bluetooth SIG, may be incompatible with your device.

Turn on the Bluetooth wireless feature

1. In Idle mode, open the application list and select Settings → Wireless and networks → Bluetooth settings.

2. Select Bluetooth to turn on the Bluetooth wireless feature.
Find and pair with other Bluetooth-enabled devices

1. In Idle mode, open the application list and select **Settings → Wireless and networks → Bluetooth settings → Scan devices.**

2. Select a device.

3. Enter a PIN for the Bluetooth wireless feature or the other device’s Bluetooth PIN, if it has one, and select **OK.** Alternatively, select **Accept** to match the PIN between your device and the device.

   When the owner of the other device enters the same PIN or accepts the connection, pairing is complete. If the pairing is successful, the device will automatically search for available services.

   Some devices, especially headsets or hands-free car kits, may have a fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you must enter it.

Send data using the Bluetooth wireless feature

1. Select a file or item, such as a contact, memo, or media file, from an appropriate application or **My files.**

2. Press [→] → **Share, Send via,** or **Send namecard via → Bluetooth.**

3. Search for and pair with a Bluetooth-enabled device.

Receive data using the Bluetooth wireless feature

1. In Idle mode, open the application list and select **Settings → Wireless and networks → Bluetooth settings → Visible.**

   Your device is visible to other Bluetooth devices for 120 seconds.
Wi-Fi

Learn to use your device’s wireless networking capabilities to activate and connect to any wireless local area network (WLAN) compatible with the IEEE 802.11 b/g/n standards. You can connect to the internet or other network devices anywhere an access point or wireless hotspot is available.

Your device uses non-harmonised frequency and is intended for use in all European countries. The WLAN can be operated in the EU without restriction indoors, but cannot be operated outdoors in France.

2 When prompted, enter the PIN for the Bluetooth wireless feature and select OK (if necessary).

3 Select Accept to confirm that you are willing to receive data from the device (if necessary). Received data is saved to the bluetooth folder.

Activate the WLAN feature

In Idle mode, open the application list and select Settings → Wireless and networks → Wi-Fi settings → Wi-Fi.

An active WLAN running in the background will consume battery power. To preserve battery power, activate the WLAN only when needed.

Find and connect to a WLAN

1 In Idle mode, open the application list and select Settings → Wireless and networks → Wi-Fi settings. The device will automatically search for available WLANs.

2 Select a network under Wi-Fi networks.

3 Enter a password for the network (if necessary).

4 Select Connect.
Connectivity

Add a WLAN manually

1. In Idle mode, open the application list and select Settings → Wireless and networks → Wi-Fi settings → Add Wi-Fi network.

2. Enter the SSID for the network and select the security type.

3. Set the security settings depending on the selected security type.

4. Select Save.

AllShare

Learn to use the Digital Living Network Alliance (DLNA) service that enables you to share media files between DLNA-enabled devices in your home over a WLAN.

You must first activate the WLAN feature and add a WLAN profile. ► p. 83

Customise DLNA settings for sharing media files

To allow other DLNA-enabled devices to access media files on your device, you must activate media sharing.

Some files may not play on the DLNA-enabled devices depending on the devices.

1. In Idle mode, open the application list and select AllShare.

2. Select Settings.

3. Adjust the following settings to customise the DLNA feature:

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Media server name</td>
<td>Enter a name for your device as a media server.</td>
</tr>
<tr>
<td>Share media</td>
<td>Turn on video sharing, image sharing, or music sharing with other DLNA-enabled devices.</td>
</tr>
<tr>
<td>Option</td>
<td>Function</td>
</tr>
<tr>
<td>------------------------</td>
<td>--------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Access point network</td>
<td>Select a WLAN AP to use for DLNA connections.</td>
</tr>
<tr>
<td>Upload from other devices</td>
<td>Set whether or not to accept the upload from other devices.</td>
</tr>
</tbody>
</table>

» **Play your files on another DLNA-enabled device**

1 In Idle mode, open the application list and select AllShare.

2 Select **Play file from my phone on another player**.

3 Select a media category and select files you want to play.

4 Select **Add to playlist**.

5 Select a player—the one that will play the media file. Playback begins at the selected player.

6 Control playback using icons of your device.   

    > Playback may be buffered, depending on the network connection and the connected server.

» **Play files of one device on the other device**

1 In Idle mode, open the application list and select AllShare.

2 Select **Play file from server on another player via my phone**.  

    Your device automatically searches for DLNA-enabled devices.

3 Select a device as the media server—the one that contains media files.
Connectivity

86

Share your device's mobile network via USB

1 Using a PC data cable, connect the multifunction jack on your device to a PC.

2 In Idle mode, open the application list and select Settings → Wireless and networks → Tethering and portable hotspot.

3 Select USB tethering to activate the USB tethering feature.

Your device shares the mobile network connection on your PC.

To stop sharing the network connection, clear the check box next to USB tethering.

The sharing method for the network connection may differ depending on the PC’s operating system.

4 Select a media category and select files you want to play.

5 Select Add to playlist.

6 Select a player—the one that will play the media file. Playback begins at the selected player.

7 Control playback using icons of your device.

USB tethering and portable hotspot

Learn to set your device as a wireless modem or wireless access point for PCs or other devices, and share your device's mobile network connection.
Share your device's mobile network via WLAN

1. In Idle mode, open the application list and select **Settings → Wireless and networks → Tethering and portable hotspot**.

2. Select **Mobile AP** to activate the WLAN hotspot. Your device searches for and connects to a WLAN.

3. From another device, locate your device's name in the available connection list and connect to the network. Your device shares the mobile network connection on another device.

PC connections

Learn to connect your device to a PC with a PC data cable in various USB connection modes. By connecting the device to a PC, you can transfer data to and from your device directly and use the Samsung Kies program.

Connect with Samsung Kies

Ensure that Samsung Kies is installed on your PC. You can download the program from the Samsung website (www.samsungmobile.com).

1. Using a PC data cable, connect the multifunction jack on your device to a PC. Samsung Kies will launch automatically.
   If Samsung Kies does not automatically launch, double-click the Samsung Kies icon on your PC.

2. Copy files from the PC to the phone. Refer to the Samsung Kies help for more information.
Connect as a mass storage device

You can connect your device to a PC as a removable disk and access the file directory. If you insert a memory card in the device, you can also access the file directory of the memory card by using the device as a memory card reader.

The file directory of the memory card will appear as a removable disk, separate from the internal memory.

1. If you want to transfer files from or to a memory card, insert a memory card into the device.
2. Using a PC data cable, connect the multifunction jack on your device to a PC.
3. Open the shortcut panel.
4. Select **USB connected → Turn on USB storage → OK**.
5. Open the folder to view files.
6. Copy files from the PC to the memory card.

7. When you are finished, select **Turn off USB storage**.

To disconnect the device from the PC, click the USB device icon on the Windows task bar and click the option to safely remove the mass storage device. Then remove the PC data cable from the PC. Otherwise, you may lose data stored on the memory card or damage the memory card.

VPN connections

You can create virtual private networks (VPN) and connect to your private network securely through a public network, such as the internet.

Your device should already be configured with internet access. If you have trouble accessing the internet, you need to edit connections. If you are not sure about the connection information to enter, ask your service provider.
Set up VPN connections

1. In Idle mode, open the application list and select Settings → Wireless and networks → VPN settings → Add VPN.

2. Select a VPN type.

3. Customise the connection information.

   Available options may vary depending on the VPN type.

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>VPN name</td>
<td>Enter a name of the VPN server.</td>
</tr>
<tr>
<td>Set VPN server</td>
<td>Enter the IP address of the VPN server.</td>
</tr>
<tr>
<td>Enable Encryption</td>
<td>Set to encrypt the VPN server.</td>
</tr>
<tr>
<td>Set IPsec pre-shared key</td>
<td>Enter a pre-shared key.</td>
</tr>
</tbody>
</table>

Option Function

<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable L2TP secret</td>
<td>Set to use the L2TP secret password.</td>
</tr>
<tr>
<td>Set L2TP secret</td>
<td>Enter the L2TP secret password.</td>
</tr>
<tr>
<td>Set user certificate</td>
<td>Select a user certificate that the VPN server uses to identify you. You can import certificates from the VPN server or download from the web.</td>
</tr>
<tr>
<td>Set CA certificate</td>
<td>Select a certificate authority (CA) certificate that the VPN server uses to identify you. You can import certificates from the VPN server or download from the web.</td>
</tr>
<tr>
<td>DNS search domains</td>
<td>Enter the domain name server (DNS) address.</td>
</tr>
</tbody>
</table>
Connect to a private network

1. In Idle mode, open the application list and select Settings → Wireless and networks → VPN settings.
2. Select a private network to connect.
3. Enter the user name and password and select Connect.
Clock
Learn to use clock display on the Idle screen, and set and control alarms for important events.

Use the clock display
1. In Idle mode, open the application list and select Clock.
2. While using the clock display, use the following features:
   - To create or delete an alarm, select 🕒.
   - To access Gallery, select 📄.

Set a new alarm
1. In Idle mode, open the application list and select Clock.
3. Set alarm details.
4. When you are finished, select Done.

Stop an alarm
When the alarm sounds,
   - Select Dismiss to stop the alarm.
   - Select Snooze to repeat the alarm after a specified length of time.

• To launch the music player, select 🎵.
• To return to the idle screen, select 🏢.
**Calculator**

Learn to perform mathematical calculations directly on your device like a typical hand-held or desktop calculator.

1. In Idle mode, open the application list and select Calculator.

2. Use the keys that correspond to the calculator display to perform basic mathematical operations.

3. Press [①] → **Advanced panel** to use scientific calculator.

**My files**

Learn to quickly and easily access all of your images, videos, music, sound clips, and other types of files stored on your memory card.

1. In Idle mode, open the application list and select **My files**.

2. Select a folder.
   - To move up one level in the file directory, select Up.
   - To return to the Home directory, select Home.

3. Select a file to open.

In a folder, press [①] to use the following options:

- To send a file to others via multimedia message, email or the Bluetooth wireless feature, select **Share**.
- To create a new folder, select **Create folder**.
- To delete files or folders, select **Delete**.
- To change the view mode, select **View by**.
- To sort files or folders, select **List by**.
- To use additional features using a file, such as moving, copying or renaming option, select **More**.
SIM Toolkit
Use a variety of additional services offered by your service provider. Depending on your SIM or USIM card, this menu may be available but labelled differently.
In Idle mode, open the application list and select SIM Toolkit.

Task manager
With the task manager, you can view currently running applications, package size of applications, and memory information, and monitor the RAM memory.

1 In Idle mode, open the application list and select Task manager.
2 Use the following options:
   • Active applications: View the list of all the applications currently running on your device.

  • Package: View the package size of applications installed on your device.
  • RAM: Check and manage the RAM memory for your device.
  • Summary: View the used and available memory on your device and memory card.
  • Help: View help information about extending battery life.

ThinkFree Office
Learn to create and view document files on your device. If you have an account with the ThinkFree web service, you can manage documents online. This application supports the following file formats: txt, doc, docx, xls, xlsx, ppt, pptx, pdf.
Create a new document

1. In Idle mode, open the application list and select **ThinkFree Office**.
2. Select **Accept** to confirm, if you are launching this application for the first time.
3. Select **Activate now → Close** to activate ThinkFree Office.
4. Select **My Docs**.
5. Press `[≡] → New → a document type.
6. Enter a name for the document and select **OK**.
7. Enter contents in the document by using the tools at the bottom of the screen.
8. When you are finished editing, select on the toolbar or press `[≡] → File → Save.

View and edit a document on your device

1. In Idle mode, open the application list and select **ThinkFree Office**.
2. Select **My Docs → a document**.
3. View and edit the document as desired.
   - To zoom in or out, use the two finger zoom; Place your two fingers on the screen and slowly pinch or spread apart.
   - To open the toolbar to edit the document (word, text, or excel file), press `[≡] → Edit.
   - To search for text in the document, press `[≡] → Find.
4. When you are finished editing, save the document.
Manage documents online
1 In Idle mode, open the application list and select ThinkFree Office.
2 Select Online.
3 Enter your user name and password to access your account, and then select Sign in.
4 View and manage your documents on the server as desired.

Voice Search
Learn to use the voice command feature to dial a number, send a message, or search for locations and information by voice.

This feature may be unavailable depending on your region or service provider.

1 In Idle mode, open the application list and select Voice Search.
2 Select Speak now.
3 Say a keyword into the microphone.
Settings

Access the Settings menu

1. In Idle mode, open the application list and select Settings.
2. Select a setting category and select an option.

Wireless and networks
Change the settings for wireless network connections.

Flight mode
Disable all wireless functions on your device. You can use only non-network services.

Wi-Fi settings
- **Wi-Fi**: Turn the WLAN feature on or off. ► p. 83
- **Network notification**: Set the device to notify you when an open network is available.
- **Add Wi-Fi network**: Add WLAN APs manually.

Bluetooth settings
- **Bluetooth**: Turn the Bluetooth wireless feature on or off. ► p. 81
- **Device name**: Set a Bluetooth name for your device.
- **Visible**: Set your device to be visible to other Bluetooth devices.
- **Scan devices**: Search for available Bluetooth devices.
Tethering and portable hotspot

- **USB tethering**: Activate the USB tethering feature to share your device's mobile network connection with PCs via USB. When connected to a PC, your device is used as a wireless modem for a PC. ► p. 86
- **Mobile AP**: Activate the Portable WLAN hotspot feature to share your device's mobile network connection with PCs or other devices through the WLAN feature. ► p. 87
- **Mobile AP settings**: Configure network settings for your WLAN hotspot.

VPN settings
Set up and connect to virtual private networks (VPNs).
► p. 88

Mobile networks

- **Use packet data**: Set to allow packet switched data networks for network services.
- **Data roaming**: Set the device to connect another network when you are roaming or your home network is not available.
- **Access Point Names**: Set up access point names (APNs). To reset your APN settings to the factory values, press [⏣] → **Reset to default**.
- **Use only 2G networks**: Set the device to connect only to a 2G network.
- **Network operators**: Search for available networks and select a network for roaming.

Call settings
Customise the settings for calling features.
Fixed Dialing Numbers

- **Enable FDN**: Activate or deactivate FDN mode to restrict calls to numbers in the FDN list. You must enter the PIN2 supplied with your SIM or USIM card.
- **Change PIN2**: Change the PIN2, which is used to protect the primary PIN.
- **FDN list**: Set up a list of contacts for fixed dialling.

Voicemail service

Select your service provider’s voicemail service. You can also select other voicemail services if you downloaded applications that support them.

Voicemail number

Enter the number to access the voicemail service. You can obtain this number from your service provider.

Call forwarding

Divert incoming calls to another number.

Additional settings

- **Caller ID**: Display your caller ID to other parties for outgoing calls.
- **Call waiting**: Allow incoming call alerts when a call is in progress.

Sound

Change the settings for various sounds on your device.

- **Silent mode**: Activate the silent mode to mute all sounds except media sounds and alarm ringtones.
- **Vibrate**: Set when the device will vibrate for various events.
• **Volume**: Adjust the volume level for call ringtones, music and videos, alarm ringtones, system sound, and notification ringtones.

• **Phone ringtone**: Select a ringtone to alert you to incoming calls.

• **Notification ringtone**: Select a ringtone to alert you to events, such as incoming messages and missed calls.

• **Audible touch tones**: Set the device to sound when you touch the keys on the dialling screen.

• **Audible selection**: Set the device to sound when you select an application or option.

• **Screen lock sounds**: Set the device to sound when you lock or unlock the touch screen.

---

**Display**

Change the settings for the display.

• **Wallpapers**:
  - **Home screen wallpaper**: Select a background image for the idle screen.
  - **Lock screen wallpaper**: Select a background image for the screen lock.

• **Font style**: Change the font type for the display text. You can download fonts from Android Market by selecting *Get fonts online*.

• **Brightness**: Set the brightness of the display.

• **Auto-rotate screen**: Set whether or not to rotate the content automatically when the device is rotated.

• **Animation**: Set the device to display animation when you switch between windows.
- **Screen timeout**: Set the length of time the device waits before turning off the display’s backlight.
- **Horizontal calibration**: Calibrate the geomagnetic sensor when the compass or augment reality application shows incorrect information.

## Location and security

Change the settings for securing your device and the SIM or USIM card, and GPS functionality.

- **Use wireless networks**: Set to use WLAN and/or mobile networks for finding your location.
- **Use GPS satellites**: Set to use the GPS satellite for finding your location.
- **Set screen lock**: Set the unlock security code. When you have set your security code, this option changes to **Change screen lock**.
  - **None**: Disable the screen lock.
  - **Pattern**: Set an unlock pattern to unlock the screen.
  - **PIN**: Set a PIN (numeric) to unlock the screen.
  - **Password**: Set a password (alphanumeric) to unlock the screen.
- **Use visible pattern**: Set the unlock pattern to be visible as you draw it.
- **Use tactile feedback**: Set the device to vibrate when you touch and draw the unlock pattern.
- **Set up SIM card lock**:
  - **Lock SIM card**: Activate or deactivate the PIN lock feature to require the PIN before using the device.
  - **Change SIM PIN**: Change the PIN used to access SIM or USIM data.
• **Visible passwords**: Set the device to display your password as you enter.

• **Select device administrators**: View device administrators installed on your device. You can activate device administrators to apply new policies to your device.

• **Use secure credentials**: Use certificates and credentials to ensure secure use of various applications.

• **Install from SD card**: Install encrypted certificates that are stored on a memory card.

• **Set password**: Create and confirm a password for accessing credentials.

• **Clear storage**: Erase the credential contents from the device and reset the password.

### Applications

Change the settings for managing installed applications.

• **Unknown sources**: Select to download applications from any source. If you do not select this option, you can download applications only from Android Market.

• **Manage applications**: Access the list of the applications installed on the device and check the application information.

• **Running services**: View the services you are using and access them to manage.

• **Development**:
  - **USB debugging**: This is for application development. When your device is connected to a PC with a PC data cable, the USB debugging mode will be activated and Samsung Kies will launch automatically.
  - **Stay awake**: Set the device’s screen to stay on while charging the battery.
- **Allow mock locations**: Allow mock locations and service information to be sent to a Location Manager service for testing. This is for application development.

- **Samsung Apps**: Select a network connection (WLAN or packet switched data network) to get application update notification from Samsung Apps.

  This feature may be unavailable depending on your region or service provider.

---

**Privacy**

Change the settings for managing your settings and data.

- **Back up my data**: Back up your device’s settings to the Google server.

- **Automatic restore**: Set the device to restore applications' data you backed up when they are installed in your device.

- **Factory data reset**: Reset your settings to the factory default values.

---

**Accounts and sync**

Change the settings for the auto sync feature or manage accounts for synchronisation.

- **Background data**: Select this setting to use the auto sync feature. The auto sync will run in the background without opening applications and synchronise data.

- **Auto-sync**: Set the device to synchronise contact, calendar, and email data automatically.

---

**SD card and phone storage**

Check memory information of memory cards and your device, and format a memory card.
Search
Change the Google Search settings.

- **Google search:**
  - **Show web suggestions:** Set the device to display suggestions while you are entering a keyword.
  - **Use My Location:** Set the device to use your current location for Google search and other Google services.
  - **Search history:** Set the device to show the search history of your Google account.
  - **Manage search history:** Manage the search history of your Google account.

- **Searchable items:** Select the types of items to include in your search.

- **Clear shortcuts:** Clear the information from recent searches.

Language and keyboard
Change the settings for text input.

- **Select language**
  Select a display language for all menus and applications.

- **Swype**
  - **Language:** Select a language for text input.
  - **Word prediction:** Set the device to predict words according to your input and display word suggestions.
  - **Audio feedback:** Set to alert you when there are no alternative words for your input if you double-tap a word.

You cannot enter text in some languages. To enter text, you should change the writing language to one of the supported languages.
• **Enable tip indicator**: Set to alert you to quick help by blinking the tip indicator.
• **Auto-spacing**: Set the device to automatically insert a space between words.
• **Auto-capitalization**: Set the device to automatically capitalise the first letter after a final punctuation mark, such as a period, question mark, or exclamation mark.
• **Show complete trace**: Set to display the trace of your dragging on the keyboard.
• **Word choice window**: Set how often the word list will display.
• **Speed vs. accuracy**: Set the balance for the speed and accuracy.
• **Swype help**: Access help information for using the Swype keyboard.

• **Tutorial**: Learn how to enter text faster with the Swype keyboard.
• **Version**: View version information.

➤ **Samsung keypad**
• **Portrait keypad types**: Select the default input method, such as the QWERTY keyboard, traditional keypad, or handwriting screen.
• **Input languages**: Select languages for text input.

You cannot enter text in some languages. To enter text, you should change the writing language to one of the supported languages.

• **XT9**: Activate XT9 mode to enter text using Predictive input mode.
• **XT9 advanced settings**: Activate the advanced features of XT9 mode, such as auto completion, auto correction, or auto substitution, and set up your own word list.
• **Keypad sweeping:** Enable or disable the keypad sweeping feature for the text input mode. You can switch between input modes by scrolling left or right on the keypad.

• **Auto-capitalization:** Set the device to automatically capitalise the first letter after a final punctuation mark, such as a period, question mark, or exclamation mark.

• **Handwriting settings:** Customise the recognition time in Handwriting mode.

• **Voice input:** Activate the voice input feature to enter text by voice on the Samsung keypad.

• **Auto-full stop:** Set the device to insert a period when you double-tap the space bar.

• **Tutorial:** Learn how to enter text with the Samsung keypad.

---

**Voice input and output**

Change the settings for the voice recogniser and the text-to-speech feature.

▷ **Voice recognition settings**

• **Language:** Select a language for the Google voice recognition.

• **SafeSearch:** Set the device to filter explicit text and/or images from voice search results.

• **Block offensive words:** Hide offensive words your device recognised from voice search results.

• **Show hints:** Set to show a suggested term or phrase for the voice search feature.
Text-to-speech settings

• **Listen to an example**: Listen to the spoken text for an example. Install voice data for using the text-to-speech feature.

• **Always use my settings**: Set the device to use the settings you specify in applications rather than the default settings.

• **Default engine**: Set the speech synthesis engine to be used for spoken text.

• **Install voice data**: Download and install voice data for the text-to-speech feature.

• **Speech rate**: Select a speed for the text-to-speech feature.

• **Language**: Select a language for the text-to-speech feature.

• **Engines**: View the text-to-speech engines downloaded from Android Market.

Accessibility

Change the settings for accessibility features.

• **Accessibility**: Activate an accessibility application you have downloaded, such as Talkback or Kickback, which provide voice, melody, or vibration feedback.

• **The power key ends calls**: Set the device to end a call when you press [Ø].

Date and time

Access and alter the following settings to control how time and date are displayed on your device:

• **Automatic**: Automatically update the time when you move across time zones.

• **Set date**: Set the current date manually.

• **Select time zone**: Set your home time zone.
• **Set time**: Set the current time manually.

• **Use 24-hour format**: Set to the time to be displayed in 24-hour format.

• **Select date format**: Select a date format.

**About phone**
Access information about your device, check the device’s status, and learn how to use your device.
When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

<table>
<thead>
<tr>
<th>Code</th>
<th>Try this to solve the problem:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Password</td>
<td>When the device lock feature is enabled, you must enter the password you set for the device.</td>
</tr>
<tr>
<td>PIN</td>
<td>When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the <strong>Lock SIM card</strong> menu.</td>
</tr>
<tr>
<td>PUK</td>
<td>Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.</td>
</tr>
</tbody>
</table>

Your device displays "Service unavailable" or "Network error"

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again.
- You cannot access some options without a subscription. Contact your service provider for more details.

The touch screen responds slowly or improperly

If your device has a touch screen and the touch screen is not responding properly, try the following:
• Remove any protective covers from the touch screen. Protective covers may prevent the device from recognising your inputs and are not recommended for touch screen devices.

• Ensure that your hands are clean and dry when tapping the touch screen.

• Restart your device to clear any temporary software bugs.

• Ensure that your device software is upgraded to the latest version.

• If the touch screen is scratched or damaged, take it to your local Samsung Service Centre.

Your device freezes or has fatal errors
If your device freezes or hangs, you may need to close programs or reset the device to regain functionality. If your device is frozen and unresponsive, press and hold [ Ⓞ ] for 8-10 seconds. The device will reboot automatically.

If this does not solve the problem, perform a factory data reset. In Idle mode, open the application list and select Settings → Privacy → Factory data reset → Reset phone → Erase everything.

Calls are being dropped
When you are in areas with weak signals or poor reception, you may lose your connection to the network. Move to another area and try again.

Outgoing calls are not connected
• Ensure that you have pressed the Dial key.
• Ensure that you have accessed the right cellular network.
• Ensure that you have not set call barring for the phone number you are dialling.
Incoming calls are not connected
• Ensure that your device is turned on.
• Ensure that you have accessed the right cellular network.
• Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call
• Ensure that you are not covering the built-in microphone.
• Ensure that the microphone is close to your mouth.
• If using a headset, ensure that it is properly connected.

Audio quality is poor
• Ensure that you are not blocking the device’s internal antenna.
• When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again.

When dialling from contacts, the call is not connected
• Ensure that the correct number is stored in the contact list.
• Re-enter and save the number, if necessary.
• Ensure that you have not set call barring for the contact’s phone number.

The device beeps and the battery icon flashes
Your battery is low. Recharge or replace the battery to continue using the device.

The battery does not charge properly or the device turns off
• The battery terminals may be dirty. Wipe both gold-coloured contacts with a clean, soft cloth and try charging the battery again.
• If the battery will no longer charge completely, dispose of the old battery properly and replace it with a new battery (refer to your local ordinances for proper disposal instructions).

Your device is hot to the touch

When you use applications that require more power or use applications on your device for an extended period of time, your device may feel hot to the touch. This is normal and should not affect your device’s lifespan or performance.

Error messages appear when launching the camera

Your Samsung mobile device must have sufficient available memory and battery power to operate the camera application. If you receive error messages when launching the camera, try the following:
• Charge the battery or replace it with a battery that is fully charged.

• Free some memory by transferring files to a PC or deleting files from your device.
• Restart the device. If you are still having trouble with the camera application after trying these tips, contact a Samsung Service Centre.

Error messages appear when launching the FM radio

The FM radio application on your Samsung mobile device uses the headset cable as an antenna. Without a headset connected, the FM radio will be unable to receive radio stations. To use the FM radio, first ensure that the headset is properly connected. Next, scan for and save the available radio stations.

If you still cannot use the FM radio after performing these steps, try accessing your desired station with another radio receiver. If you can hear the station with another receiver, your device may require service. Contact a Samsung Service Centre.
**Troubleshooting**

**Another Bluetooth device is not located**
- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to, if necessary.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).

If the tips above do not solve the problem, contact a Samsung Service Centre.

**A connection is not established when you connect the device to a PC**
- Ensure that the PC data cable you are using is compatible with your device.
- Ensure that you have the proper drivers installed and updated on your PC.

---

**Error messages appear when opening music files**

Some music files may not play on your Samsung mobile device for a variety of reasons. If you receive error messages when opening music files on your device, try the following:

- Free some memory by transferring files to a PC or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate license or key to play the file.
- Ensure that your device supports the file type.
Safety precautions

To prevent injury to yourself and others or damage to your device, read all of the following information before using your device.

**Warning: Prevent electric shock, fire, and explosion**

Do not use damaged power cords or plugs, or loose electrical sockets

Do not touch the power cord with wet hands, or disconnect the charger by pulling on the cord

Do not bend or damage the power cord

Do not use your device while charging or touch your device with wet hands

Do not short-circuit the charger or the battery

Do not drop or cause an impact to the charger or the battery

Do not charge the battery with chargers that are not approved by the manufacturer

Do not use your device during a thunderstorm

Your device may malfunction and your risk of electric shock is increased.

Do not handle a damaged or leaking Lithium Ion (Li-Ion) battery

For safe disposal of your Li-Ion batteries, contact your nearest authorised service centre.

Handle and dispose of batteries and chargers with care

- Use only Samsung-approved batteries and chargers specifically designed for your device. Incompatible batteries and chargers can cause serious injuries or damage to your device.
- Never dispose of batteries or devices in a fire. Follow all local regulations when disposing of used batteries or devices.
- Never place batteries or devices on or in heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode when overheated.
- Never crush or puncture the battery. Avoid exposing the battery to high external pressure, which can lead to an internal short circuit and overheating.
Safety precautions

Protect the device, batteries, and chargers from damage
- Avoid exposing your device and batteries to very cold or very hot temperatures.
- Extreme temperatures can cause the deformation of the device and reduce the charging capacity and life of your device and batteries.
- Prevent batteries from contacting metal objects, as this can create a connection between the + and – terminals of your batteries and lead to temporary or permanent battery damage.
- Never use a damaged charger or battery.

Caution: Follow all safety warnings and regulations when using your device in restricted areas

Turn off your device where prohibited
Comply with all regulations that restrict the use of a mobile device in a particular area.

Do not use your device near other electronic devices
Most electronic devices use radio frequency signals. Your device may interfere with other electronic devices.

Do not use your device near a pacemaker
- Avoid using your device within a 15 cm range of a pacemaker if possible, as your device can interfere with the pacemaker.
- If you must use your device, keep at least 15 cm away from the pacemaker.
- To minimise the possible interference with a pacemaker, use your device on the opposite side of your body from the pacemaker.

Do not use your device in a hospital or near medical equipment that can be interfered with by radio frequency
If you personally use any medical equipment, contact the manufacturer of the equipment to ensure the safety of your equipment from radio frequency.

If you are using a hearing aid, contact the manufacturer for information about radio interference
Some hearing aids may be interfered with by the radio frequency of your device. Contact the manufacturer to ensure the safety of your hearing aid.

Turn off the device in potentially explosive environments
- Turn off your device in potentially explosive environments instead of removing the battery.
- Always comply with regulations, instructions and signs in potentially explosive environments.
• Do not use your device at refuelling points (service stations), near fuels or chemicals, and at blasting areas.
• Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories.

**Turn off your device when in an aircraft**
Using your device in an aircraft is illegal. Your device may interfere with the electronic navigation instruments of the aircraft.

**Electronic devices in a motor vehicle may malfunction due to the radio frequency of your device**
Electronic devices in your car may malfunction due to radio frequency of your device. Contact the manufacturer for more information.

**Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle**
While driving, safely operating the vehicle is your first responsibility. Never use your mobile device while driving, if it is prohibited by law. For your safety and the safety of others, practice good common sense and remember the following tips:

• Use a hands-free device.
• Get to know your device and its convenience features, such as speed dial and redial. These features help you reduce the time needed to place or receive calls on your mobile device.
• Position your device within easy reach. Be able to access your wireless device without removing your eyes from the road. If you receive an incoming call at an inconvenient time, let your voice mail answer it for you.
• Let the person you are speaking with know you are driving. Suspend calls in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and heavy traffic can be hazardous.
• Do not take notes or look up phone numbers. Jotting down a “to do” list or flipping through your address book takes attention away from your primary responsibility of driving safely.
• Dial sensibly and assess the traffic. Place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call, dial only a few numbers, check the road and your mirrors, then continue.
• Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.

**Safety precautions 115**
• Use your device to call for help. Dial a local emergency number in the case of fire, traffic accident, or medical emergencies.
• Use your device to help others in emergencies. If you see an auto accident, a crime in progress, or a serious emergency where lives are in danger, call a local emergency number.
• Call roadside assistance or a special, non-emergency assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or another special, non-emergency number.

Proper care and use of your mobile device

Keep your device dry
• Humidity and all types of liquids may damage device parts or electronic circuits.
• When wet, remove the battery without turning on your device. Dry your device with a towel and take it to a service centre.
• Liquids will change the colour of the label that indicates water damage inside the device. Water damage to your device can void your manufacturer’s warranty.

Do not use or store your device in dusty, dirty areas
Dust can cause your device to malfunction.

Do not store your device on slopes
If your device falls, it can be damaged.

Do not store your device in hot or cold areas. Use your device at -20 °C to 50 °C
• Your device can explode if left inside a closed vehicle, as the inside temperature can reach up to 80 °C.
• Do not expose your device to direct sunlight for extended periods of time (such as on the dashboard of a car).
• Store the battery at 0 °C to 40 °C.

Do not store your device with such metal objects as coins, keys and necklaces
• Your device may become deformed or malfunction.
• If the battery terminals are in contact with metal objects, it may cause a fire.

Do not store your device near magnetic fields
• Your device may malfunction or the battery may discharge from exposure to magnetic fields.
• Magnetic stripe cards, including credit cards, phone cards, passbooks, and boarding passes, may be damaged by magnetic fields.
• Do not use carrying cases or accessories with magnetic closures or allow your device to come in contact with magnetic fields for extended periods of time.

Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers
• The battery may leak.
• Your device may overheat and cause a fire.

Do not drop your device or cause impacts to your device
• The screen of your device may be damaged.
• If bent or deformed, your device may be damaged or parts may malfunction.

Do not use a flash close to the eyes of people or animals
Using a flash close to the eyes may cause temporary loss of vision or damage to the eyes.

Ensure maximum battery and charger life
• Avoid charging batteries for more than a week, as overcharging may shorten battery life.
• Over time, unused batteries will discharge and must be recharged before use.
• Disconnect chargers from power sources when not in use.
• Use batteries only for their intended purposes.

Use manufacturer-approved batteries, chargers, accessories and supplies
• Using generic batteries or chargers may shorten the life of your device or cause the device to malfunction.
• Samsung cannot be responsible for the user’s safety when using accessories or supplies that are not approved by Samsung.

Do not bite or suck on the device or the battery
• Doing so may damage the device or cause explosion.
• If children use the device, make sure that they use the device properly.

When speaking on the device:
• Hold the device upright, as you would with a traditional phone.
• Speak directly into the mouthpiece.
• Avoid contact with your device’s internal antenna. Touching the antenna may reduce the call quality or cause the device to transmit more radio frequency than necessary.
Hold the device with a relaxed grip, press the keys lightly, use special features that reduce the number of keys you have to press (such as templates and predictive text), and take frequent breaks.

**Protect your hearing**
- Excessive exposure to loud sounds can cause hearing damage.
- Exposure to loud sounds while driving may distract your attention and cause an accident.
- Always turn the volume down before plugging the earphones into an audio source and use only the minimum volume setting necessary to hear your conversation or music.

**Use caution when using the device while walking or moving**
Always be aware of your surroundings to avoid injury to yourself or others.

**Do not carry your device in your back pockets or around your waist**
You can be injured or damage the device if you fall.

**Do not disassemble, modify, or repair your device**
- Any changes or modifications to your device can void your manufacturer’s warranty. For service, take your device to a Samsung Service Centre.
- Do not disassemble or puncture the battery, as this can cause explosion or fire.

**Do not paint or put stickers on your device**
Paint and stickers can clog moving parts and prevent proper operation. If you are allergic to paint or metal parts of the product, you may experience itching, eczema, or swelling of the skin. When this happens, stop using the product and consult your physician.

**When cleaning your device:**
- Wipe your device or charger with a towel or a rubber.
- Clean the terminals of the battery with a cotton ball or a towel.
- Do not use chemicals or detergents.

**Do not use the device if the screen is cracked or broken**
Broken glass or acrylic could cause injury to your hands and face. Take the device to a Samsung Service Centre to have it repaired.

**Do not use the device for anything other than its intended use**
Avoid disturbing others when using the device in public

Do not allow children to use your device
Your device is not a toy. Do not allow children to play with it as they could hurt themselves and others, damage the device, or make calls that increase your charges.

Install mobile devices and equipment with caution
- Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted.
- Avoid placing your device and accessories near or in an air bag deployment area. Improperly installed wireless equipment can cause serious injury when air bags inflate rapidly.

Allow only qualified personnel to service your device
Allowing unqualified personnel to service your device may result in damage to your device and will void your manufacturer’s warranty.

Handle SIM cards or memory cards with care
- Do not remove a card while the device is transferring or accessing information, as this could result in loss of data and/or damage to the card or device.
- Protect cards from strong shocks, static electricity, and electrical noise from other devices.
- Do not touch gold-coloured contacts or terminals with your fingers or metal objects. If dirty, wipe the card with a soft cloth.

Ensure access to emergency services
Emergency calls from your device may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternate method of contacting emergency services personnel.

Be sure to back up important data
Samsung is not responsible for data loss.

Do not distribute copyright-protected material
Do not distribute copyright-protected material that you have recorded to others without the permission of the content owners. Doing this may violate copyright laws. The manufacturer is not liable for any legal issues caused by the user’s illegal use of copyrighted material.
**Specific Absorption Rate (SAR) certification information**

Your device conforms to European Union (EU) standards that limit human exposure to radio frequency (RF) energy emitted by radio and telecommunications equipment. These standards prevent the sale of mobile devices that exceed a maximum exposure level (known as the Specific Absorption Rate, or SAR) of 2.0 W/kg. During testing, the maximum SAR recorded for this model was 0.840 W/kg. In normal use, the actual SAR is likely to be much lower, as the device has been designed to emit only the RF energy necessary to transmit a signal to the nearest base station. By automatically emitting lower levels when possible, your device reduces your overall exposure to RF energy.

The Declaration of Conformity statement at the back of this manual demonstrates your device’s compliance with the European Radio & Terminal Telecommunications Equipment (R&TTE) directive. For more information about the SAR and related EU standards, visit the Samsung website.

---

**Correct disposal of this product**

(Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.
Correct disposal of batteries in this product
(Applicable in the European Union and other European countries with separate battery return systems)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

---

**To install Kies (PC Sync)**

1. Download the latest version of Kies from the Samsung website ([www.samsungmobile.com](http://www.samsungmobile.com)) and install it on your PC.

2. Using a PC data cable, connect your device to your PC. Samsung Kies will launch automatically. If Samsung Kies does not automatically launch, double-click the Samsung Kies icon on your PC. Refer to the Kies help for more information.
